RESPONSE TO OFFICE ACTION

SIR:

Applicant hereby responds to the Office Action dated 4/19/07. The Applicant notes that he had a teleconference with Supervisor John Hayes on 6/20/07 during which this office action was discussed. The summary of the telecom was recorded in writing by Examiner Hayes and mailed to the Applicant (copy enclosed). The applicant hereby

incorporates the notes of the telecom into this Office Action response. As noted on the telecom notes Examiner Hayes and the applicant agree that the Kahn reference is irrelevant to this application and fails to teach a "unique digital identifier unique to said bloody worn storage device." Examiner Hayes also stated in the telecom that the Applicant was not required to file an RCE and that a Response to Office action was only necessary at this point. The Applicant also has had numerous informal telecoms with Examiner Gilligan (who has been assigned this application) regarding the notes of Examiner Hayes and the issues he has raised about Yeager's reader wand, issues with Sellers art, and the suggestion that new matter (Internet, and websites) was added to the Applicant's specification. The Applicant is confident that these issues will be addressed in this response.

As the Examiner will see this application 09/583 336 is related to other applications and art that the Applicant conceived, invented and documented. Specifically this application is related to art described in US 6,467,690 (application 09/288,437) and applications 09,578,664 and 09/589,107. The Applicant point out that the original 09/583,336 application has a section with the following text and notes:

B. CROSS REFERENCE OF RELATED APPLICATIONS

The following applications by inventor William Reeves are related to this application:

US 6,467,690

09/597,107

09/578,664

It is the intent of this inventor that these related applications, coupled with the application herein, shall comprise an overall system for organizing medical records and other data for access in a medical emergency.

JUL 12 2007

It is also noted to the Examiner that original application 09/578,664 has the notes and text:

CROSS REFERENCE TO RELATED APPLICATIONS

This patent application is related to US patent applications 09/583,336 and 09/597,107 by inventor William Reeves which deal with inventions and art related to this application.

It is also noted to the Examiner that original application 09/597,107 has the notes and text:

CROSS REFERENCE TO RELATED APPLICATIONS

This patent application is related to US patent applications 09/578,664 and 09/583,336 and US patent 6,467,690

It is clear from these notes that the art conceived in these four applications is all related And further notes in each specification make reference to the other applications and the related art. Specifically application 09/583,336 makes reference to this prior art on page 4 , DETAILED DESCRIPTION OF THE INVENTION....Reference figure 1.....first paragraph and page 6Reference Figure 6first paragraph.....

Therefore it is justified that the Applicant amends his specification to incorporate By Reference these applications and art which are specifically mentioned herein and in the original specification.
